Insights and Analysis

1. KPIs - Overall Business Performance

Insight: Total Sales \$489.31K, Total Quantity 3K units, Total Cost \$280.71K, Total Profit \$208.60K, Total Orders 1K. Profit margin = $208.6K / 489.31K = 42.6\%$. H1 2017 is profitable with strong cost control.

Recommendation: Maintain current pricing. Target 45%+ margin by negotiating 2-3% supplier discount. At 42.6%, every \$10K cost cut = \$10K extra profit.

2. Monthly Sales Distribution

Insight: "Monthly Sales Distribution" shows Jan \$360,975.21 spike = 74% of H1 revenue. Feb-May flat \$19K-26K. June recovers to \$79K. Not seasonal - clear one bulk/corporate order in Jan.

Recommendation: Identify Jan customer in Sales table. Launch "H2 Bulk Order Campaign" in Aug-Sep targeting B2B buyers. Set goal: replicate 30% of Jan revenue in Q3.

3. Daily Revenue Distribution

Insight: "Daily Revenue Distribution" by weekday: Saturday \$65,209, Monday \$33,976, Sunday \$44,765 are peak days. Tuesday \$14,342 + Wednesday \$8,389 are dead. 70% revenue from Fri-Sun-Mon.

Recommendation: Push email/SMS promos on Tue/Wed with "Midweek Deal". Stock inventory for Sat/Mon. Analyze if Jan bulk order was placed on Monday.

4. Bottom 5 Products by Total Orders

Insight: "Bottom 5 Products by Total Orders" bar chart: Mountain 500 SL, Mountain 500 BL, Mountain 300 SL, Mountain 300 BL, Touring 1000 SL all at 22-26 orders. <3% of 1K total orders. All slow movers.

Recommendation: Discontinue all 5 SKUs immediately. Run 25% clearance sale to liquidate. Reallocate warehouse space + marketing budget to Mountain-200 series.

5. Country by Revenue, Orders & Profit

Insight: Map tooltips show: United States: \$145,103 revenue, 523 orders, \$83,064 profit → 52% of orders, \$277/order Australia: \$149,999 revenue, 296 orders, \$58,812 profit → \$506/order, highest value United Kingdom: \$68,706 revenue, 168 orders, \$28,972 profit Canada: \$46,145 revenue, 171 orders, \$20,321 profit France: \$48,512 revenue, 138 orders, \$17,486 profit Germany: \$47,128 revenue, 134 orders, \$19,967 profit US = volume leader. Australia = value leader. Europe stable but small.

Recommendation*: Defend US with loyalty program to protect 52% share. Push Mountain-200 Silver 38 in Australia - highest rev/order + highest profit SKU match. Test local pricing in UK/Canada to lift \$/order.

6. Most Profitable Product

Insight: "Most Profitable Product" card: Mountain-200 Silver, 38 = \$15,257.02 profit. Highest profit despite not being highest volume

Recommendation: Shift 60% production capacity to Mountain-200 Silver 38. Train sales team to upsell this SKU. Use it as "premium" bike vs high-volume Mountain-500.

7. Slicer Interactivity

Insight: Date slicer 1/1/2017-6/30/2017 + Country slicer filter entire dashboard. Hover tooltips give exact country/month/day data. Management can compare US vs AU, Jan vs June instantly.

Recommendation: Use slicers in monthly ops review. Standard view: "All Countries, All Dates" → Drill: "Australia only, June only" to check if H2 actions worked.

Conclusion

Adventure Works H1 2017 is profitable at 42.6% margin but faces 3 critical risks: 1) 74% revenue from single Jan bulk order, 2) 5 dead SKUs tying up stock, 3) US volume vs Australia value imbalance. H2 Action Plan: Replicate Jan deal, kill dead SKUs, push Mountain-200 Silver 38 in Australia, fix Tue/Wed sales dip. Target: \$600K H2 revenue with same 42%+ margin. Copy-paste this to Word
